Thank you for a great macroeconomics course and the chance to learn these concepts freely online. I enjoyed learning from Dr. Navarro, his staff of helpers, and class mates who participated in the discussion forums. I was also thankful for the help I received from class mates who helped me with the document posting of the slide snap shots taken from the lecture videos, since they went beyond what I knew to do there and were often able to get the posts done quickly, providing great documents and the text of the words spoken outside of what was in the lecture slides. So thank you everyone for all the contributions made.

I was wondering if the solutions to the final exam would be posted, and I know it is listed that the answers will be available after the exam period is completed. However, last semester, I somehow missed getting the solutions to Dr. Navarro's microeconomics final exam, and if anyone has those, I would appreciate those too. Although I did well enough in both macroeconomics and microeconomics on the final exams, I did get some answers incorrect, and it would be great to know which questions were wrong and the correct answers, to complete the economics learning experience.

Thanks to everyone and I wish you all the best in the future!
